

Gulf Inspection International Co. (GIICo), a Kuwait shareholding company (closed), was established in 1976. Today, the firm operates from principal office and laboratory section in Subhan Industrial Area, Kuwait to serve clients throughout Kuwait, Southern Iraq and Middle East. The core activities have been investigation, testing, assessment, inspection, monitoring, installation and instrumentation in the field of Geotechnical, Topographical Survey, Drilling Water Wells, Industrial Inspection & Environmental Services to clients including Government, Oil & Gas Industry, Construction Industry, Research & Educational Institutes.

GIICo employs over 240 highly trained, experienced work force and professionals. Most of the firm's employee possesses graduate and postgraduate level degrees with specialized training in their fields. **GIICo's** valuable clients include Ministry of Energy (E & W), Kuwait Oil Company (KOC), Kuwait National Petroleum Company (KNPC), Kuwait Institute for Scientific Research (KISR), Public Authority for Housing Welfare (PAHW), International and local Contracting & Consulting firms in the field of Petrochemical, Oil & Gas, Construction Industries.

GIICo's objective is to occupy a strong market position supported by keeping close watch of technological developments and the provision of high quality services. **GIICo** is a registered firm with ISO 9001:2008 certification. All operations and procedures conform to the Quality Management System.

We are an accomplished and diverse team of professionals. We owe much of our success to the expertise and specialist skills of our team. We have a multidisciplinary team with the necessary experience and innovative skills to suit all projects, large or small.

The performance and passion of the GIICo Team is central to the quality of service we provide. With our varied portfolio of work, staff training and support it enables us to attract and retain a highly skilled, experienced and committed Team that consistently provides a professional service to a broad spectrum of clients. GIICo's staff includes Professional Engineers, Professional Geologists, Engineering Interns, Certified Inspectors, Technicians, Lab Managers, Professional Chemists, Survey Engineers, and more. This group of diverse men and women possess expertise in a variety of design and construction applications.

Quality Control & Material Testing Services

TRUST OUR EXPERIENCE TO MANAGE YOUR BUSINESS

GIICo is equipped with a certified laboratory capable of providing prompt materials testing results. Our laboratory Engineers / Technicians inspect, test, and certify materials with efficient test data turnaround.

During the construction phase of projects, GIICo's qualified and well-trained engineers and technicians conduct on-site and laboratory tests on various construction materials to verify compliance with the required specifications and standards. Typical field tests for earth works include in-situ density of compacted layers by sand-replacement method using Sand-Cone and Speedy Moisture Tester. Field tests for fresh concrete include determination of temperature, slump, air content and density.

TECHNOLOGY

To be able to meet the requirements of our clients we have ongoing research and development programmes covering every aspect of our work.

QUALITY

GIICo provides services of high quality, has a proven track record and remains committed to the success of each assignment it undertakes.

TEAMWORK

As employees cooperate with each other and leverage each other's strengths, there is more productivity in GIICo.

Laboratory tests for quality control of soils, aggregates, concrete, asphalt and water include the following:

- Soils
Particle Size Distribution (Sieve and Hydrometer), Atterberg Limits, Proctor, CBR, Chemical
- Aggregate
Percent Finer #200 sieve, Grading, Soundness, Los Angeles Abrasion, Flakiness Index, Elongation Index, Absorption, Bulk, SSD & Apparent densities, Chemical tests
- Concrete
Compressive Strength (cubes, cylinder, blocks), Cement content, Water absorption, Coring, core preparation and compressive strength, Chemical tests, Other tests for fresh & hardened concrete
- Asphalt
Coring, Layer thickness, Density, Extraction, Gradation analysis
- Water
Potable water Analyses, Water analyses for concrete mix, Environmental analysis

Calibration of Testing Equipment

GII Co has various reference instruments for calibration of thermometers, balances and scales, moulds, batching plants etc. We also calibrate speedy moisture tester and sand cone. GII Co has various reference instruments for calibration of thermometers, balances and scales, moulds, batching plants etc. We also calibrate speedy moisture tester and sand cone.

Consultancy Services

We also undertake consultancy services for evaluation of stockpile material, design of concrete mix, trial mixes, preparation of specifications, establishment of QA and QC schemes, failure investigations and statistical analysis of concrete tests etc.

Third Party Inspection & Testing Services

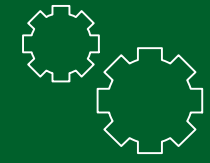

GII Co has the capability to set up full scale site laboratory for third party testing services in major project sites according to the requirements of client specifications.

Condition Survey and Structural Evaluation by Load Test

GII Co's engineers and technicians have vast experience on condition survey of new, old and fire damaged structures. To accomplish this task we possess different testing equipments such as Drilling Machines, Core Bits with Diameter ranging from 3" to 6", Ultrasonic Pulse Velocity (UPV), Covermeter, Half-Cell Potential, Schmidt Hammers, Concrete resistivity, pull off/out tests, petrographic analysis etc. Both materials and structural analyses are conducted.

We also have capabilities to conduct structural load test on structural elements and evaluation based on the test results to check their structural integrity.

GII Co can also supply experienced technicians as per the project contract requirements for QA/QC works involving earth works, concrete inspections etc.

TECHNOLOGY

To be able to meet the requirements of our clients we have ongoing research and development programmes covering every aspect of our work.

QUALITY

GII Co provides services of high quality, has a proven track record and remains committed to the success of each assignment it undertakes.

TEAMWORK

As employees cooperate with each other and leverage each others strengths, there is more productivity in GII Co.

Our Clients

FEW OF OUR CLIENTS

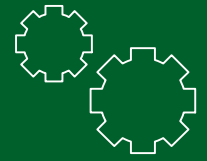

Our Associates / Agencies

Our client partnerships are the most valued, vital aspects of what we do and who we are. Without our clients, our work would have no meaning. We aim to go above and beyond to exceed our clients' expectations. We are only successful when our clients are successful. We build meaningful, genuine relationships with our clients, and we succeed because of the people we hire. Our associates value our clients' trust and confidence. We use these genuine relationships and partnerships to create innovative strategies and approaches for solving management and behavioral economics challenges together.

For more information about our services and capability, please visit our website www.giico.net or contact us by email, fax or phone.
