SUBJECT: Gulf Inspection International Company at Kuwait City, Kuwait - Laboratory Validation
VALIDATION EXPIRES 14 June 2021

Dear Eng. Ayman Maher,

This letter confirms the extension of our validation for the Gulf Inspection International Company materials testing laboratory located at Kuwait City, Kuwait.

This laboratory is approved to perform the materials tests listed on Tables 1-5 of your initial validation letter for Middle East District (MED), U.S. Army Corps of Engineers (USACE) projects. This validation is based on the laboratory inspection performed by MED 11-12 November 2019.

This certification will be included with records that are maintained at the MED Headquarters in Winchester, Virginia. This certification is valid until **14 June 2021**. To maintain validation past this date, the laboratory must be re-inspected by MED.

This certification applies only to the location(s) listed above and is contingent upon the laboratory's continued adherence to applicable testing and quality control standards and equipment calibrations. MED may revoke this certification or require re-inspection at any time.

The inspection and certification process for the laboratory adhered to procedures outlined by the Materials Testing Center (MTC), which is located at the Geotechnical and Structures Laboratory (GSL), U.S. Army Engineer Research and Development Center (ERDC) in Vicksburg, Mississippi, USA. To facilitate construction in Gulf Region countries, MED conducts laboratory validations in accordance with MTC protocol.

Questions about this certification or requests for renewal should be sent to DLL-CETAM-CONSTRUCTION-LAB@USACE.ARMY.MIL.
